

If we could shrink the Earth's population to a village of precisely 100 people...with all the existing human ratios remaining the same...it would look like this

There would be:

60 Asians

12 Europeans

13 from the Western Hemisphere, north and south

14 Africans

And 1 from the South Pacific

51 would be male

49 would be female

82 would be non-white

18 white

67 would be non-Christian

33 Christians

89 would be heterosexual

11 would be homosexual

32% of the entire world's wealth would be in the hands of only 5 people, and all 5 would be citizens of the United States

Speaking of the United States, there are around 17 million people with work disabilities. And now, back to the world...

80 would live in substandard housing

1 would have HIV

67 would be unable to read

33 would not have a safe water supply

50 would suffer from malnutrition

1 would be near death

2 would be near birth

Only 1 would have a college education

24 would not have any electricity

7 people would have access to the Internet

33 would be trying to live on only 3% of the world's income
